Papers

[1] **A. Le van, J. Royer**, Integral equations for three-dimensional problems. *International Journal of Fracture*, 31, 125-142, 1986.
[2] **A. Le van, B. Peseux**, Boundary element analysis of an integral equation for three-dimensional crack problems. *International Journal of Numerical Methods in Engineering*, 26, 2383-2402, 1988.
[3] **A. Le van, J. Royer**, Theoretical basis of regularized integral equations for elastostatic crack problems. *International Journal of Fracture*, 44, 155-166, 1990.
[4] **A. Le van, J. Royer**, A numerical procedure for regularized integral equations for elastostatic problems of flat cracks in opening mode. *Engineering Fracture Mechanics*, 40, 2, 237-250, 1991.
[5] **A. Le van, J. Royer**, Part circular surface cracks in round bars tension, bending and twisting. *International Journal of Fracture*, 61, 71-99, 1993.
[6] **A. Le van, J. Royer**, Boundary formulation for three-dimensional anisotropic crack problems. *Applied Mathematical Modelling*, 20, 662-674, 1996.
[7] **A. Le van**. Boundary integro-differential equation for anisotropic bodies with initial strains or stresses. *Applied Mathematical Modelling*, 21, 145-153, 1997.
[8] **V. Sladek, J. Sladek, A. Le van**, Completely regularized integral representations and integral equations for anisotropic bodies with initial strains, *Z. Angew. Math. Mech. (ZAMM)*, 78, 11, 771-780, 1998.
[9] **B. Burgardt, M. Bonnet, A. Le van**, A regularized direct symmetric Galerkin BIE formulation for three-dimensional elastoplasticity. *Advances Mathematical and Computational Mechanics Aspects of the Boundary Element Method*, Ed. Tadeusz Burczynski, Kluwer Academic Publishers, 1999, 51-62. ISBN : 0-7923-7081-3.
[10] **A. Le van, P. Le Grognec**, Modeling and Numerical Computation of Necking in Round Bars Using a Total Lagrangian Elastoplastic Formulation, *Computer Modeling in Engineering & Sciences* (ed. S. N. Atluri), 2, 1, 63-72, 2001.
[11] **A. Le van, G. de Saxcé, P. Le Grognec**, General formulation for local integration in standard elastoplasticity with an arbitrary hardening model, *Computers and Structures*, 81, 2099-2109, 2003.
[12] **P. Le Grognec, A. Le van**, Bifurcations primaires et secondaires d'un cylindre sous compression axiale, *Revue Européenne des Eléments Finis*, vol. 12, n° 1, 7-41, 2003.
[13] **P. Le Grognec, A. Le van**, Modélisation numérique du flambement élastoplastique d'une poutre sous compression axiale, *Revue Européenne des Eléments Finis*, vol. 12, n° 7-8, 887-906, 2003.
[14] **R. Bouzidi, A. Le van**, Numerical solution of hyperelastic membrane by energy minimization, *Computers and Structures*, 82, 1961-1969, 2004.
[15] **A. Le van, C. Wielgosz**, Bending and buckling of inflatable beams: some new theoretical results, *Thin-Walled Structures*, vol. 43, 1166-1187, 2005. Erratum: *Thin-Walled Structures*, vol. 44, 822–823, 2006.
DOI: 10.1016/j.tws.2005.03.005
[16] **A. Diaby, A. Le Van, C. Wielgosz**, Modélisation du plissage dans les structures membranaires, *Revue Européenne de Mécanique Numérique*, vol. 15, n°1-2-3, 143-154, 2006.
[17] **A. Diaby, A. Le Van, C. Wielgosz**, Buckling and wrinkling of prestressed membranes, *Finite Elements in Analysis and Design*, 42, 992-1001, 2006.
[18] **A. Le van, C. Wielgosz**, Finite element formulation for inflatable beams, *Thin-Walled Structures*, vol. 45, 221-236, 2007. Erratum: *Thin-Walled Structures*, vol. 45, 634–635, 2007.
DOI:10.1016/j.tws.2007.01.015
[19] **F. Schoefs, A. Le van**, **M. Rguig,** A cracked beam finite element for through-cracked tube, *Communication in Numerical Methods in Engineering*, 24:761–775, 2008.
DOI: 10.1002/cnm.988
[20] **P. Le Grognec, A. Le van**, Elastoplastic bifurcation and collapse of axially loaded cylindrical shells, *International Journal of Solids and Structures*, Vol. 45, n°1, pp. 64-86, 2008.
DOI: 10.1016/j.ijsolstr.2007.07.017
[21] **A. Le van, T.H.T. Nguyen**, Une formulation variationnelle du problème de contact avec frottement de Coulomb, *Comptes Rendus Mécanique*, Vol 33, fasc.7, pp 606-611, 2008.
DOI: 10.1016/j.crme.2008.05.003
[22] **P. Le Grognec, A. Le van**, Some new analytical results for plastic buckling and initial post-buckling of plates and cylinders under uniform compression, *Thin-Walled Structures*, vol. 47, pp 879–889, 2009.
DOI : 10.1016/j.tws.2009.02.010
[23] **A. Le van, T.H.T. Nguyen**, A weighted residual relationship for the contact problem with Coulomb friction, *Computers and Structures*, 87, 1580–1601, 2009.
doi:10.1016/j.compstruc.2009.08.013
[24] **P. Le Grognec, A. Le van**, On the plastic bifurcation and post-bifurcation of axially compressed beams, *International Journal of Non-Linear Mechanics*, vol. 46, n°5, pp 693-702, 2011.

DOI: 10.1016/j.ijnonlinmec.2011.02.001
[25] **R. Bouzidi, S. Buytet, A. Le van**, A numerical and experimental study of the quasi-static deployment of membrane tubes, *International Journal of Solids and Structures*, Vol. 50, pp 651–661, 2013.
DOI: 10.1016/j.ijsolstr.2012.10.027
[26] **J.C. Thomas, A. Le van**, An exact solution for inflated orthotropic membrane tubes, *Thin-Walled Structures,* vol.67, pp 116-120, 2013.
DOI: 10.1016/j.tws.2013.01.012
[27] **Q.T. Nguyen, J.C. Thomas, A. Le van**, An analytical solution for an inflated orthotropic membrane tube with an arbitrarily oriented orthotropy basis, *Engineering Structures*, 56, pp 1080-1091, 2013.
DOI: 10.1016/j.engstruct.2013.06.012
[28] **Q.T. Nguyen, J.C. Thomas, A. Le van**, Inflation and bending of an orthotropic inflatable beam, *Thin-Walled Structures*, 88, pp. 129-144, 2015.
DOI: 10.1016/j.tws.2014.11.015
[29] **J.C. Thomas, A. Le van**, Deflections of pneumatic masts and columns, *Architectural Engineering and Design Management*, 17:3-4, 299-315, 2021.
DOI: 10.1080/17452007.2020.1738998
[30] **P. Lacorre, A. Le van, R. Bouzidi, J.C. Thomas**, A plate theory for inflatable panels, *International Journal of Solids and Structures*, Vol. 256, pp, 2022.
DOI: https://doi.org/10.1016/j.ijsolstr.2022.111969

Books

[1] **Mécanique des Solides Indéformables** (*Mechanics of Rigid Bodies*), 565 pages. R. Bouzidi, A. Le van, J.C. Thomas, *Hermes-Lavoisier*, Paris, 2014.

[2] **Coques et Membranes - Fondements de l'approche non linéaire** (*Shells and Membranes – Fundamentals of the Nonlinear Approach*), 280 pages. A. Le van, *Ellipses*, Paris, 2015.

[3a] **Théorie Non-Linéaire des Plaques Elastiques**, 216 pages. A. Le van, *ISTE*, 2017.

ISBN papier : 9781784053079, ISBN ebook : 9781784063078

[3b] **Nonlinear Theory of Elastic Plates**, 212 pages. A. Le Van, *ISTE Press - Elsevier*, 2017.

Hardcover ISBN: 9781785482274

[4a] **Mécanique de Lagrange - Une approche analytique avancée**, 320 pages, A. Le van, R. Bouzidi, *ISTE*, 2019.

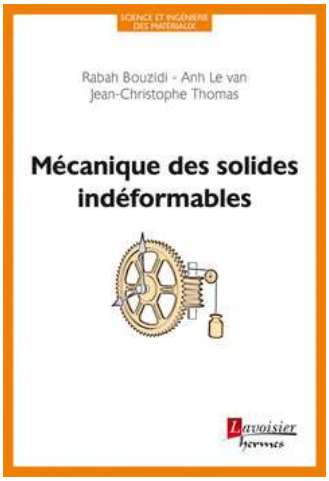

ISBN papier : 9781784056148, ISBN ebook : 9781784066147

[4b] **Lagrangian Mechanics - An Advanced Analytical Approach**, 326 pages, A. Le van, R. Bouzidi, *Wiley-ISTE*, 2019.

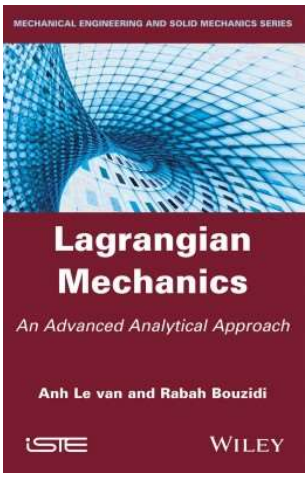

Hardcover ISBN: 9781786304360

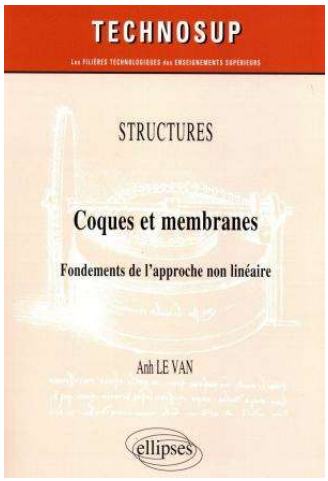

[5] **Contact en mécanique des structures - Une approche des résidus pondérés**, 262 pages, A. Le van, ISTE, 2022.

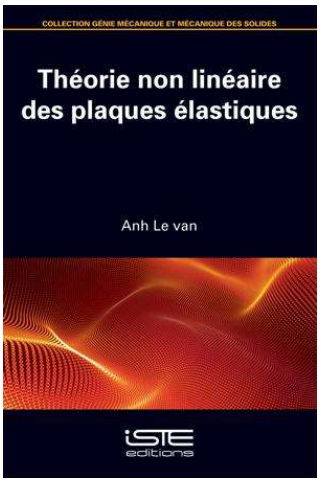

ISBN papier : 9781784058562, ISBN ebook : 9781784068561

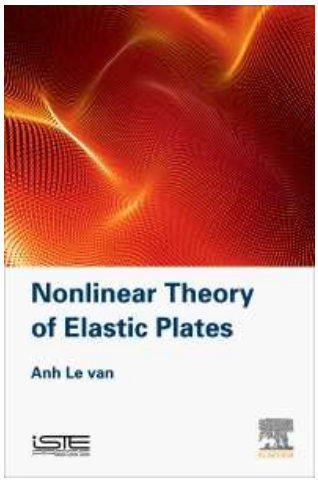

Rabah Bouzidi - Anh Le van
